Summary of decision points & feedback from actions from previous working session

The following tasks were defined during this and the previous sessions:

<i>No.</i>	<i>Context</i>	<i>Task</i>	<i>Status</i>	<i>Due date</i>
2.5	Connection to the MI&WM learning environment	Marco Martens to present the obligation of MP to deliver data to the learning environment	To do	22-05-2020
2.6	Input from the group	Everyone is encouraged to give feedback on the draft specification on Github .	To do	06-05-2020
4.1	Rotating chair	Representatives of the G5 may be interested in chairing the future CDS meetings. Bon and Ross will ask for their willingness for chairing	To do	22-05-2020
4.2	Roadmap	To align different initiatives and ideas regarding CDS Ross plans to create a first roadmap or blueprint	To do	22-05-2020

1. Approval of report of previous working session

The report of the previous working session (#3) has been approved. It will be added to Github.

2. Chairing and organization of future meetings

- The attendance of municipalities during this specific meeting is low due to another MaaS meeting that is scheduled at the same time.
- Last weeks the interest of the G5 or municipalities grew and the G5 is going to be involved as a client. Representatives of the G5 may be interested in chairing the future CDS meetings. Bon and Ross will ask for their willingness for chairing (4.1).

3. CDS roadmap and blueprint

- To align different initiatives and ideas regarding CDS Ross plans to create a first roadmap or blueprint (4.2). Ferdinand will also contribute with an international perspective.
- Tijs is also working on a discussion paper about the what and why of CDS. He will include privacy and business perspectives.
- Beforehand, developing CDS does not look as complicated as developing the TOMP-API. The timeline of CDS can be shorter.

Next meeting to take place on 20-05-2020, 10:00h. Availability of the G5 needs to be checked.
